Order Picker License Moose Jaw

Order Picker License Moose Jaw - Order picking is otherwise called order preparation operation. This is amongst the chief processes in a warehouse and consists of people called order pickers, collecting and taking articles in a certain quantity previous to shipment so as to fulfill client orders. Order picking is a simple warehousing process. The efficiency in which this job is accomplished can be directly connected to the productivity of a supply chain. Therefore, order picking is one of the most controlled logistic methods. Order picking falls within the category of the warehouse management system.

There are specific types of order picking which comprise: pick to box method, wave picking method, piece picking or picker to part method, zone picking method and sorting systems method.

The pick to box method consists of the order picker filling the box with the stuff from her or his station. The box then moves to other picking locations until the client order is complete. In this particular process, there is no movement of the order picker personnel. In the wave picking method, the order pickers move about to collect the needed things for several orders. The picker to part method or piece picking is similar where the order picker or pickers move to gather the items needed but for one order only.

In the sorting systems method, there is no movement of the order picking personnel. Instead, the things are delivered to her or him through an automated system such as automatic storage or a conveyor system. In the zone picking method, each order picker is assigned to one specific zone. They are responsible for only realizing order picking within this specific zone.
