

## **Aerial Lift Train the Trainer Moose Jaw**

Aerial Lift Train the Trainer Moose Jaw - The train the trainer program for aerial lifts helps to teach the trainers how to safely train potential operators in an industrial situation. Trainers would be given in-depth instruction on the workings of aerial lift equipment. The program is offered on an open enrollment basis and delivered at selected training locations. Before the certification, trainers are evaluated and graded on their demonstrated skills and understanding.

The Aerial Lifts Train the Trainer Certification Program emphasizes practical learning. As the number one training provider in the business, we give the best hands-on training possible through chances to practice techniques and concepts learned inside the classroom. Along with hands-on experience, trainers develop general understanding of instructional techniques and machine theory, classroom and field communication skills, and ability to efficiently train and assess operators. Trainers will gain an understanding about what traits make a successful trainer.

The Aerial Lift Train the Trainer Certification Program teaches the instructional techniques involved in communicating concepts inside a classroom and/or field situation. Knowledge requires a training component to be effectual in workplace environments. There are three aspects of equipment operation that the trainer should learn how to convey to operators: what to perform; how to do it; and the reason why it must be carried out.

In the program, trainers will be given the detailed, latest reference material to better help them convey the information to equipment operators. The guidebooks used, include detailed information about all aspects of industrial mobile machine operator training. Incorporated within the package are training aids which provide a visual reference to improve the learning experience. The equipment-specific training products include essential materials for both the trainer and the operator: overhead transparencies, videos/DVD's, safety message posters, kinds of equipment; stability pyramids and digital training aids.
