By revolutionizing the operator restraint system protection feature, Clark proudly remains a leader of innovation in the industrial equipment and automated forklift industry. This exceptional dedication to safety is at this time a standard feature on every lift truck.

Clark has a continual mission to have the No. 1 quality system in the industry which is demonstrated by their commitment to ISO standards. Clark, is the first manufacturer of forklifts and lift trucks to be internationally certified with quality standard ISO 9001 in all of its production plants. Also, the ISO 14001 Environmental Stewardship System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement allows Clark to be ready for any number of environmental limitations, thus placing them in a dominant market position.

Supply Efficient Production

Clark has preferred the particularly economical and advantageous system of "Lean Production" for its assembly plants and application of resources. This structure was established to acknowledge the most efficient method of production facility stewardship and ensuring maximum proficiency. Clark has concluded this transition of its Korean facility. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and production efficiencies.

Engineering

Clark's product engineers and suppliers communicate together to improve the proficiency and brilliance of their merchandise while minimizing costs. The contemporary value engineering program combines modern product growth and delivers superior customer support and service within the industry.
