Start-up of the forklift industry

In the beginning the home-based lift truck market in Korea was an open import enterprise. Korea Machinery Co. Ltd. started in 1960, to import fully assembled lift trucks as part of a domestic equipment expansion project. Sales of these goods were originally targeted to state-run firms, large scale organizations, and the military. This eventually led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced trade operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a forklift manufacturing plant was successfully completed. Continuous technical instruction grew to become the new focus for improving quality and product development.

Lift Truck Export Growth

Daewoo began the first domestic forklift business in 1967, and quickly acquired a massive 90% share in the Korean Materials Handling market. By the 1980's, Daewoo's sophisticated technological advancements combined with sales success placed them in a position of significant expansion of their lift truck business.

In 1981, Caterpillar Industrial Inc. of the United States, proposed a cooperative venture project to counter act competitive pressures in the US materials handling industry. This plan drastically expanded Daewoo's lift truck sales. Construction was completed in 1984 to facilitate a contemporary plant which helped establish the company for the manufacture of high added-value goods suited for export. In 1993, the corporation had a global sales network and started exporting versions they had developed through in-house technology, as an sovereign brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing growth opportunities into overseas markets.
